

Glitter Gel Toes

Time: 15 minutes

Time that the enhancements should last: Up to nine weeks

Suggested Price: Cost of one pedicure.

Supplies needed: Magic Wand, e-file, mandrel, 180 grit medium sanding band, square wipes, Swipe, Protein Bond, mani•Q base, any glitters for mixing, nail brush, mani•Q Cleanser, regular mani•Q (black tub), gel lamp and 150 grit zebra file.

1. Push back cuticles and remove protein growth on all ten toes.
2. Use electric file to prepare natural nails using a mandrel and 180 grit medium sanding band.
3. Use Swipe and square wipe to remove dust and oil from natural nails.
4. Apply Protein Bond to all nails.
5. Apply a thin layer of mani•Q base to one foot. Cure two minutes under UV or LED light.
Repeat on other foot.
6. Apply a thin layer of clear mani•Q (black tub). Sprinkle glitter to completely cover the nail.
7. Cure for 30 seconds under UV or LED light.
8. Repeat steps 6 and 7 on other foot.
8. Apply another thin layer of clear mani•Q (black tub). Cure for one minute under LED or two minutes under UV light. Repeat on other foot.
9. When first foot is removed from light leave sticky residue on nails. Apply mani•Q top coat. Cure for 30 seconds under LED or two minutes under UV. Repeat on other foot.
10. After nails have cured, use mani•Q Cleanser to remove sticky residue.
11. When both feet are completely cured, take your 150 grit zebra file and remove any rough edges.
12. Apply Rose Oil.
13. If the customer wants a pedicure, provide that service after the gel toes have been completed.

**TO REMOVE GLITTER GEL TOES, USE YOUR MEDIUM SANDING BANDS AND FILE THEM OFF.
MAKE SURE NOT TO DAMAGE THE NATURAL NAIL WHEN REMOVING THE GEL.**
